A highly successful METALTECH and AUTOMEX 2022 came to a close today, and we could not be more grateful for the tremendous support that we have received from all parties to make this event the triumph that it has been.

While navigating two years of the pandemic without having physical events was challenging for us, it has been truly fulfilling to make this positive return to MITEC and witness the enthusiasm from exhibitors and visitors to re-establish the importance of these landmark exhibitions to the industry.

Over the past week, we were honoured by the participation of over 200 exhibitors from 11 countries within the key industry profiles of Machine Tools and Metalworking, Robotics and Automation, Precision Metrology and Industrial Supplies, and welcomed over 12, 284 buyers and visitors from 27 countries and regions to the Malaysia International Trade and Exhibition Centre.

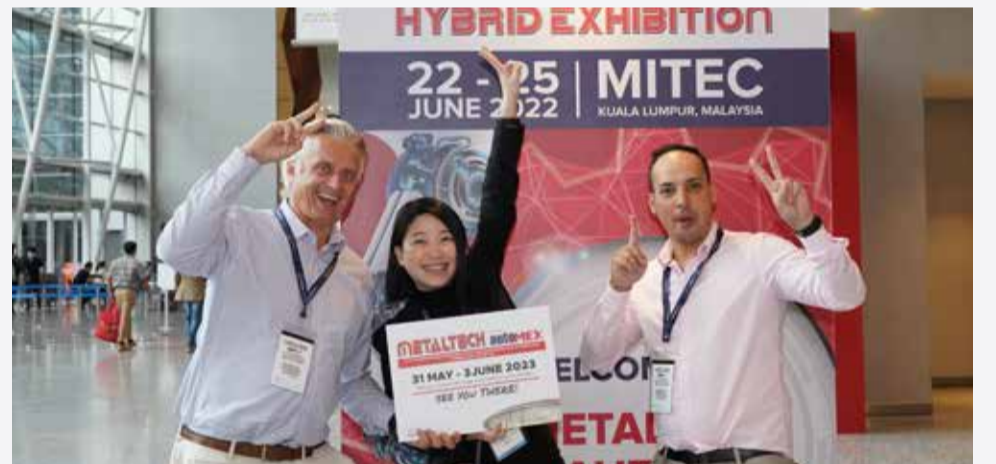

We are thrilled that METALTECH and AUTOMEX continues to lead the way as Malaysia's most comprehensive platform for industry players to network, and we are committed to growing our efforts each year to provide even more means for participants to gain business opportunities, such as through the introduction of our Hybrid Exhibition with virtual elements this year.

Having said that, we are pleased to announce that **METALTECH and AUTOMEX 2023 has been confirmed to be held next year at MITEC from 31 May to 3 June 2023.** The official launch was held during the Reunion Party on Tuesday night and was officiated by Chairman of METALTECH & AUTOMEX Dato' Dr Tan Chin Huat.

With a significant number of exhibitors having already signed up for next year, we are confident of bringing you and even bigger and better experience next year. Exhibitors who wish to register their participation for next year's event are invited to email marketing@metaltech.com.my for further information.

In closing, we would like to say a very big 'Thank You' to all our sponsors, exhibitors, buyers, visitors, international pavilions, seminar speakers, organising team and international government agencies and associations that have provided us with their enduring support.

SEE YOU AGAIN NEXT YEAR!

Our **DIGITAL PLATFORMS** Are Still OPEN

The physical event may be over, but our virtual marketplace is still open! In our efforts to provide as much value as possible to all METALTECH and AUTOMEX participants, we are keeping our virtual marketplace open until 29 July 2022 so that you can continue to enjoy the benefits of our digital platform.

Visit www.metaltechautomex-virtual.com and login with the password provided in your registration email to enter our virtual marketplace and seize the exciting opportunities available there!

EXHIBITORS TESTIMONIALS

“

Our company is a product lifecycle management solutions company that provides engineering solutions to the industry from design all the way to manufacturing and productions. A lot of visitors tell us that they come to METALTECH looking for new technology, digitalisation, smart manufacturing solutions, automation and robotics, which is very much in line with what we have prepared for the crowd this year. We have gotten more inquiries this year compared to the past because I think people are more knowledgeable now about these new technologies and it has been easier this year to engage with new customers and prospects.

JULLIE TEO
Sales Director
Dream Technology System Sdn Bhd

”

“

This is the first time we have joined METALTECH and our experience here has been quite positive and quite good. We managed to talk to industry players and gain their feedback while sharing with them on the new trends and technologies that we can provide to them.

KON SEE KUAN
General Manager
UMW Industries (1985) Sdn Bhd

”

“

METALTECH is a very long-lasting event since many years ago. It is the event that can bring all types of industry players to the same area so this is a very good opportunity for us to exhibit here so that we can engage with many different types of industry people.

BRYANT WU
Marketing Manager
Positive Yield Sdn Bhd

”

“

I never expected that when we come back here after two years that there would be so many people here, including a lot of decision makers. METALTECH has become a household name within the industry and it is a one stop solution for all industry players to attend and source for everything!

SHENG HAINING
Director
Beijing Jingdiao
Group Co. Ltd

”

“

AUTOMEX is the leading automation exhibition in Malaysia and we exhibit every show. We have always had high expectations and so far, we have not been let down. This year again our experience has been quite positive. The size of the crowd has exceeded our expectations and we are delighted to see such a successful turnout for the first time in a long time. We have had many visitors and have been successful in gaining many business opportunities, also this is a good opportunity to meet and reconnect with many partners and customers that we have not been able to meet face-to-face in a long time.

NARZAKI KENTARO
General Manager
Factory Automation & Industrial Design

”

VISITORS TESTIMONIALS

“

My company is moving towards Industry 4.0, precisely looking at Smart Manufacturing. This is a good avenue for me as I saw on the advertising that this event will be covering automation engineering and IR 4.0, which is why I decided to attend. This is my first time at this exhibition and it's good and massive. I have viewed a lot of the companies here and there's a lot of good Industry 4.0 companies here.

ANAND SORONAM
President/CEO
Planar Sphere Sdn Bhd

”

“

We have found what we targeted from our visit here from three or four exhibitors, such as tooling equipment and machines. Coming back to a physical exhibition after two years, we find this event to be very big and we hope to come back again next year to find more of the latest technologies and equipment.

ALIHAN AMALI BIN ABD RAZAK
Senior Engineer
Gah Hong Precision Sdn Bhd

”

“

We came here to study more about the market and trends. We are actually a startup company so this is a good place to learn and research about the latest 3D printing tech. This is our first time at METALTECH and I can see that there's a lot of related industries here that we can learn about. It's great to be back to physical exhibitions after two years of MCO, now we can really connect with people again.
