METALTECH & AUTOMEX 2024

Riveting Showcase of Industry Innovation!

The highly anticipated METALTECH & AUTOMEX 2024 kicked off at the Malaysia International Trade & Exhibition Centre (MITEC) in Kuala Lumpur, marking a vibrant start to the event.

The atmosphere buzzed with excitement as industry professionals from across the region flocked to the exhibition halls, eager to explore the cutting edge of machine tools, metalworking, and automation technologies. Over 1,500 companies and brands unveiled their latest innovations, showcasing the transformative power of Industry 4.0. From robotics and automation marvels to pioneering metalworking techniques, the first day offered a glimpse into the future of manufacturing!

METALTECH & AUTOMEX 2024 featured a staggering 5,000+ technologies and innovations on display. International pavilions from leading countries like Germany, South Korea, Taiwan, China, and Singapore further enriched the experience, fostering a global exchange of ideas on industry advancements.

Over the next few days, METALTECH & AUTOMEX 2024 promises to be a platform for knowledge sharing, networking, and forging valuable business partnerships. Stay tuned for further updates as we delve deeper into the innovations and experiences shaping the event!

DAY 2
HIGHLIGHTS
Get ready for some top-notch events!

RECORD BREAKING TURNOUT!

Thank you for the amazing turnout. **SEE YOU TOMORROW!**

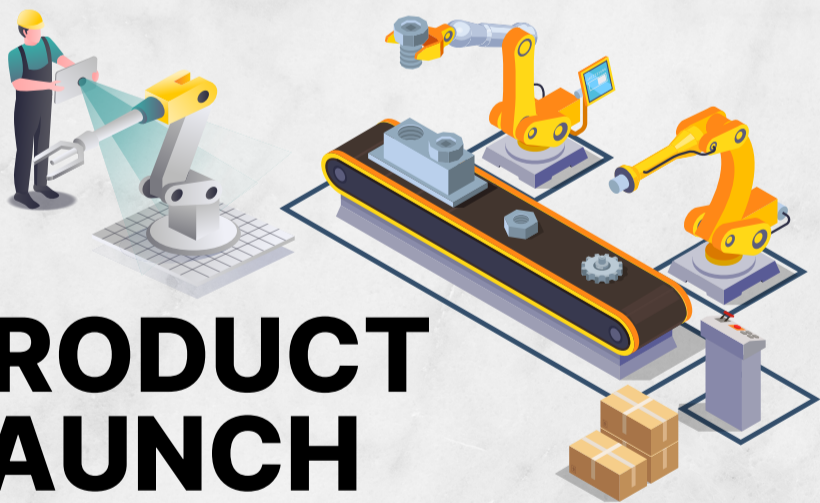

OPENING CEREMONY

We're revved up to announce the grand opening ceremony of METALTECH & AUTOMEX 2024, Southeast Asia's biggest event for machine tools, metalworking, and automation technologies!

Join us for an electrifying keynote address by our esteemed Guest of Honour, YBhg. Datuk Hanafi Sakri, Deputy Secretary General (Industry) of the Ministry of Investment, Trade and Industry (MITI). Datuk Hanafi's insights will set the stage for the future of manufacturing.

But that's not all! Datuk Hanafi will also be **leading the exclusive VIP tour of the exhibition halls**. This is your golden opportunity to **connect with industry leaders firsthand** and witness the **cutting-edge technologies** shaping the future.

Don't miss this chance to be part of the excitement! Join us and gain exclusive insights into the future of manufacturing.

PRODUCT LAUNCH

Don't miss the exciting product launch by **Aliran Tenaga Technology Sdn Bhd!** Head over to **Hall 3, Level 1 (Booth No 3335)** at METALTECH & AUTOMEX 2024 to witness the unveiling of their latest innovative solution. This is your chance to be among the first to see what promises to be a game-changer in the industry.

Industry Technology Seminar

Day 2: Future-Proof Your Manufacturing Edge!

Dive deep into the future on Day 2! Our seminar series features leading innovators showcasing cutting-edge technologies and solutions that will revolutionise manufacturing. Don't miss out on the opportunity to gain a strategic edge by learning about these industry-disrupting advancements. Join us on Day 2 and future-proof your manufacturing processes. Visit <https://metaltech.com.my/industry-seminar/> for more information.

HealthLand
Family Wellness Centre

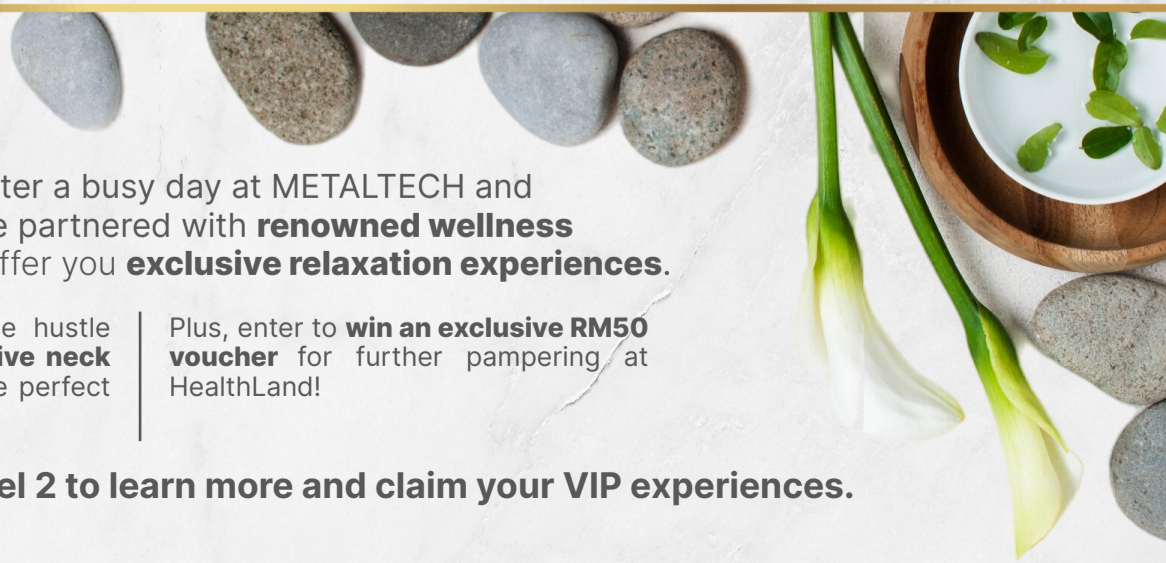

Recharge and Refocus with HealthLand

Get ready to unwind after a busy day at METALTECH and AUTOMEX 2024! We've partnered with **renowned wellness chain HealthLand** to offer you **exclusive relaxation experiences**.

VIP guests can escape the hustle and bustle with an **exclusive neck and shoulder massage**, the perfect way to refresh and refocus.

Plus, enter to **win an exclusive RM50 voucher** for further pampering at HealthLand!

Don't miss out! Head to the Gift Redemption Booth on Level 2 to learn more and claim your VIP experiences.

ADVANCE PACIFIC MACHINERY SDN BHD

BOOTH NO.: 3220

CNC MACHINERY

Advance Pacific Machinery (APM) is a top supplier of CNC machinery in Malaysia, offering a wide range of sheet metal machines including fiber lasers, press brakes, waterjet cutters, rolling machines, CNC routers, and steelworkers. APM also provides comprehensive one-stop service solutions with CAD/CAM software.

AM MACHINERY SDN BHD

BOOTH NO.: 4270 & 4280

YAWEI HLX ULTRA-FAST FIBER LASER CUTTING MACHINE

Introducing a Next-Generation Fiber Laser Cutting Machine, setting new benchmarks in speed and performance on the global stage. Experience unparalleled cutting efficiency and precision, even for the most intricate workpieces. The bed and beam structure, control and transmission system, and laser processing technology have undergone significant enhancements, surpassing all expectations.

AMRACE SDN BHD

BOOTH NO.: 3250

HYUNDAI WIA CNC

Hyundai Wia CNC machines offer top-notch precision and advanced automation in metalworking, with easy-to-use interfaces. These machines ensure outstanding performance and reliability, meeting a wide range of manufacturing needs with the latest technology and superior engineering.

BECKHOFF AUTOMATION SDN BHD

BOOTH NO.: 6000

BECKHOFF

BECKHOFF VISION

We developed eye-opening possibilities in machine vision. Explore the full potential of machine vision with Beckhoff Vision, an integrated system that combines software, illumination, and direct controller integration for simplified projects and cost reductions. Benefit from its robust, scalable design and long-term availability.

Discover more at: <https://www.beckhoff.com/ms-my/products/vision/>

G PRESS SDN BHD

BOOTH NO.: 4310

GHT SERIES PRESS BRAKE

Introducing the latest GHT series press brake by G-Press. This cutting-edge device incorporates an innovative feature that guarantees angle repeatability, irrespective of variations in thickness, length, and material. Additionally, it includes a mobile sheet follower that is capable of efficiently handling large bending parts.

HASIL KARYA SDN BHD

BOOTH NO.: 3240

YOUR LATEST LASER AND CNC MACHINE EQUIPMENT

Experience unmatched precision with our latest laser and CNC machines, crafted to enhance your manufacturing processes with superior efficiency and quality. Discover advanced technology that turns ideas into reality more swiftly and accurately than ever before.

HELI FORKLIFT (M) SDN BHD

BOOTH NO.: 8160

HELI
FORKLIFT MALAYSIA

LITHIUM BATTERY BALANCED FORKLIFT

Upgrade your forklift operations with our latest H2 series Lithium Battery Powered Forklift. Enjoy longer usage times and faster charging thanks to its advanced lithium battery technology. This forklift produces zero carbon emissions, making it a green and environmentally friendly choice. Additionally, it offers significant cost savings compared to fuel-powered models.

JASA KITA TRADING SDN.BHD.

BOOTH NO.: 8120

JASA KITA GROUP

SATA HAND TOOLS

APEX Tool Group (ATG) is a global leader in the manufacturing of professional hand and power tools. We offer a wide range of high-quality products and exceptional services tailored to meet the needs of various industries, including aerospace manufacturing, automotive assembly lines, electronic production lines, vehicle maintenance, and construction. Our commitment to excellence ensures that professionals in these industries receive the finest tools and support to enhance their operations and achieve optimal results.

LTH MACHINERY SDN BHD

BOOTH NO.: 4120

LFK FIBER LASER SMART BENDER PRESSBRAKES CNC V CUT

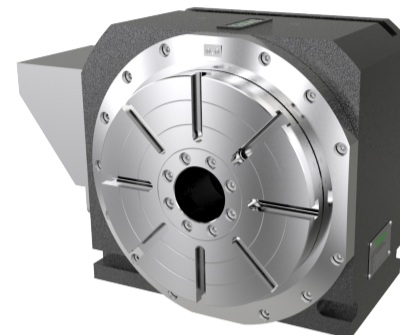

With 40 years of experience in the sheet metal market, we take pride in offering excellent products, competitive prices, a skilled team, and top-notch service. All our machines come with a 24-month warranty and complimentary service.

HIWIN SINGAPORE PTE LTD

BOOTH NO.: 2110

ROTARY TABLE

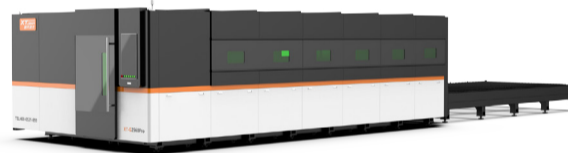

The HIWIN Torque Motor Rotary Table (TMRT) utilizes a water-cooled direct-drive torque motor, integrated with high-rigidity and high-precision bearings, absolute angle encoders, and a robust brake system. In comparison to mechanical indexing tables, the TMRT offers superior speed and torque characteristics, making it an ideal choice for various applications.

JINAN XINTIAN TECHNOLOGY CO., LTD

BOOTH NO.: 3230

XT LASER
DIGITAL | INTELLIGENT

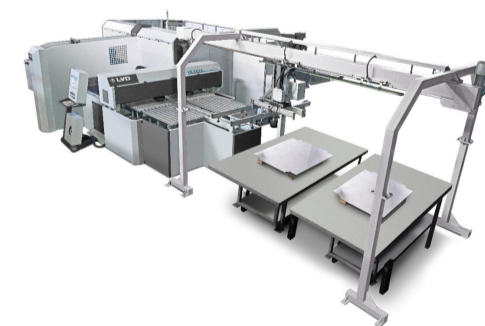

HIGH POWER LASER CUTTING MACHINE

HIGH POWER LASER CUTTING MACHINE offers precision cutting with an environmentally sustainable, all-enclosed design and integrated dust removal system. It features a high-definition camera for intuitive and safe operation, enhancing both efficiency and accuracy in the cutting process.

LVD (MALAYSIA) SDN BHD

BOOTH NO.: 3210

LVD

THE LVD MULTIFOLD AUTOMATIC PANEL BENDER

Introducing the Future of Precision Metal Fabrication: The LVD MULTIFOLD Automatic Panel Bender.

We are thrilled to unveil a groundbreaking advancement in the realm of sheet metalworking: LVD MULTIFOLD Automatic Panel Bender. This cutting-edge machine represents a revolutionary leap forward in fast, efficient, fully automatic and versatility, setting a new standard for the industry in panel production and various applications: i.e.

- Handling large-scale panels
- One set of tools for a variety of profiles
- Full automation for high productivity
- User-friendly parametric programming interface
- Multiple-stack loading
- Cost-effective machine

MONITOR ERP SYSTEM SDN BHD

BOOTH NO.: 7170

MONITOR ERP

Monitor ERP is an award-winning, complete ERP system, developed with over 50 years of experience to effortlessly fit your manufacturing processes. Monitor elevates your production quality and efficiency by integrating six key modules: Manufacturing, Purchase, Sales, Stock, Time recording, and Accounting, covering all aspects of your manufacturing operations. What sets our software apart is its user-friendly interface and cost-effectiveness, providing real-time control over shop floor operations. Our "Sustainability by Monitor" functionality enables you to measure and report CO2 emissions at the component level, complying with international and upcoming standards. Meet us at Booth 7170, Hall 7 for a Monitor ERP demo.

SANYO DENKI CO., LTD. Singapore Branch

BOOTH NO.: 7150

SANMOTION G AC SERVO SYSTEMS

SANYO DENKI has recently developed and introduced SANMOTION G, a state-of-the-art servo system. This innovative system exhibits industry-leading servo performance while maintaining a compact, lightweight, and energy-efficient design. It is ideally suited for a wide range of applications, including semiconductor manufacturing equipment, machine tools, food manufacturing equipment, and medical equipment.

NOMURADS CO., LTD.

BOOTH NO.: 3426

SWISS TYPE CNC AUTOMATIC LATHE MACHINE

As an auto lathe maker with over 70 years of tradition, we have established ourselves as a leading manufacturer in the industry.

SRITA SENDIRIAN BERHAD

BOOTH NO.: 8140

SRITA SDN BHD

Srita Sdn Bhd, founded in 1979, is a specialized importer and distributor of fastening tools, machine tools, pneumatic tools and components, quick-connect couplings, fittings, hoses, tubing, industrial hand tools, paint spray guns, and other related products.

SRITA 實利達有限公司
SRITA SENDIRIAN BERHAD
Reg. No. 49662-V

- NITTO KOHKI: Quick Connect Couplings, Air Tools, Machine Tools
- delvo: Electric Screwdrivers, Spring Balancers
- TIGON: Spring Balancers
- SHIBURA: Tube, Fittings & Spiral Hoses
- HAIRDO: Tube & Fittings
- HAIRDO: Eighteen Industrial Hoses
- HAIRDO: Pneumatic Components
- HAIRDO: Air Impact Wrenches
- HAIRDO: Precision Die Grinders
- HAIRDO: Air Screwdrivers

SUNWAY MATERIAL HANDLING SDN BHD
BOOTH NO.: 8100

SUNWAY[®]

BYD LITHIUM-ION PHOSPHATE BATTERY FORKLIFT

The BYD Forklift is equipped with a high-capacity lithium iron-phosphate battery and a high-efficiency charger, ensuring exceptional endurance and adaptability under the most extreme working conditions. Additionally, the BYD forklift produces zero emissions during charging, eliminating the need for a special charging room.

SURTREAT SOLUTIONS (M) SDN BHD
BOOTH NO.: 7138

PVD COATING

Surtreat Solutions offers a service and experience that combines technical expertise with PVD coating capabilities and performance. We provide reliable solutions that you can trust, delivering an abundance of experience, innovation, options, and support to our customers.

SURTREAT SOLUTIONS

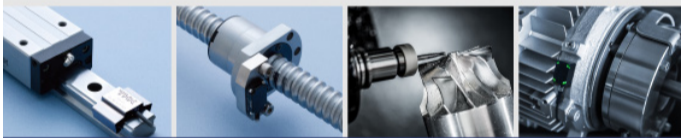

THK CO.,LTD

BOOTH NO.: 7140

OEE OPTIMIZATION PLATFORM OMNIEDGE

Predictive failure detection AI solution
Tool monitoring AI solution

OEE Optimization Platform **OMNI edge**

ATHK OMNIedge is an IoT service designed for the condition diagnosis and predictive failure detection of linear motion and ball screw components. This technology effectively minimizes losses that occur on the manufacturing floor and significantly contributes to maximizing overall equipment effectiveness (OEE).

Yamazaki Mazak Malaysia
BOOTH NO.: 4260

Mazak

MAZAK TURNING CENTERS, QTE SG SERIES
QTE-200MSY

- Compact, High-Performance CNC Turning Centers combines turning, milling, Y-axis, and a second spindle to meet diverse production needs.
- Automation solutions include bar feeder, gantry loader and Mazak Ez Loader (cobot integration).

MAZAK VERTICAL MACHINING CENTERS, VCN L SERIES
VCN SERIES

- High Efficiency Vertical Machining Center offering spindle specifications and table sizes to suit various machining needs.
- Short cycle times and durable roller guides ensure fast, stable, and accurate machining, supported by Thermal Shield technology for consistent precision.

QTE-200MSY VCN SERIES

Mazak

MAZAK QTE SG & VCN L SERIES

The MAZAK High-Performance Turning Centers (QTE SG Series) seamlessly integrate turning, milling, Y-axis capabilities, and a second spindle, enabling diverse production requirements with optional automation. Additionally, the MAZAK Efficient Vertical Machining Center (VCN L Series) provides customized spindle specifications and table sizes to cater to a wide range of machining needs.

NCT TECHNOLOGIES GROUP

ACCURL[®]
FIBER LASER

Tandem Press Brake Machine

KOREA PAVILION

KNF (KOREA NON FERROUS METALS)

BOOTH NO.: 4109

Aluminum Plates and Sheets

KNF provides qualified aluminum plates and sheets for various industries including aerospace, semiconductor, defense, EV battery, and more. We offer mill direct prices, accommodate minimum orders, provide cut-to-size options, and ensure just-in-time (JIT) service to meet the customizing requests of each customer.

ORSKOREA LLC

BOOTH NO.: 4107

GRINDING MACHINE

ORS KOREA combines our proprietary technology with new mechanisms, integrating smart AI and IT, to continuously develop innovative technologies that drive the future of the manufacturing industry. We offer a wide range of smart grinding solutions that prioritize both exceptional quality and competitive pricing.

WFN CO., LTD

BOOTH NO.: 4108

FLANGE

FLANGE

We provide both standard flanges and special flanges tailored to meet customer requirements and specifications as per their drawings. Specifications are: ASME B16.5 / B16.36 / B16.48 / B16.47 / MSS / API / JIS / KS / DIN / BS / AWWA & more!

KOTEC SYSTEM CO., LTD

BOOTH NO.: 4103

H-BEAM DRILLING MACHINE

The H-beam CNC Drilling machine utilizes high-speed three-side single-axis drilling technology, guaranteeing consistent high precision for both even and odd hole drilling on every machining surface. This machine offers the advantages of straightforward operation, high efficiency, and reliable performance.

WATERJET

BOOTH NO.: 4101

FLOW WATERJET CUTTING MACHINE

With the utilization of ultra-high pressure water jetting technology, waterjet cutting is capable of cutting nearly any material. Flow Waterjet is the leading manufacturer of waterjet cutting machines, is recognized for its precise and versatile systems. Flow waterjet machines are known for their high precision cuts, resulting in minimal waste.

YOOSUNGENG CO., LTD

BOOTH NO.: 4100

YLD HANDHELD LASER MARKING MACHINE

Introducing our high-quality laser marking machine. With a compact design, it incorporates a built-in high-speed galvanometer scanner, enabling fast speed and precise positioning. Not only does it have a long lifetime, but it is also maintenance-free. This hand-held laser marking machine is widely regarded as the industry's most comprehensive handheld fiber solution.

TAIWAN PAVILION

CHINHUNG MACHINERY CO., LTD. (KINWA)
 BOOTH NO.: 2217

SLANT BED CNC CL-280

Our machine features a highly rigid structure crafted from high-quality cast iron, providing exceptional stability. The headstock demonstrates outstanding stability, while the slideway surfaces are hardened and precision ground for optimal performance. The X and Z axes utilize boxway design, ensuring remarkable stability even during heavy cutting operations. Additionally, the machine offers multiple options for turret application, further enhancing its versatility.

CHU WEIR TECHNOLOGY CO., LTD
 BOOTH NO.: 7230

CARBIDE TOOLS

The whole process applies CNC grinding machine from Switzerland ROLLOMATIC and Germany WALTER, the coating system from Balzers. Including the tool measuring system ZOLLER and WALTER HELICHECK from Germany for the control of accuracy on finished product.

GENTIGER MACHINERY INDUSTRIAL CO., LTD.
 BOOTH NO.: 2210

CNC HIGH-SPEED HORIZONTAL BAND SAW MACHINE

The double-column structure enhances rigidity and stability, ensuring optimal performance. The rotary encoder guarantees consistent cutting force, while servo motors precisely control material feed. The independent vise design prevents material dragging, ensuring efficient operation. The inclusion of QR code scanning improves data accuracy, while the Dynamic Guide Operation Interface enhances user convenience.

HI HEAT FURNACE INDUSTRIAL CO., LTD.
 BOOTH NO.: 2213

CONTINUOUS BRIGHT HEAT TREATMENT FURNACE

This furnace is specifically designed for continuous bright brazing, bright annealing, bright hardening, and sintering processes, including stainless steel parts such as knives, scalpels, gears, screws, bearings, and more. It ensures efficient and cost-effective processing of your work, while preventing oxidation and discoloration.

Continuous Bright Heat Treatment Furnace

GMB type continuous bright heat treatment furnace is designed for continuous bright copper brazing, silver brazing, bright annealing, bright hardening and sintering, including stainless steel parts. Such as kniver, scalpels, watchcase, tablewares, valve heads, knife handles, gears, screws, bearings, levers. The furnace will process your work efficiently and economically, free of oxidation and discoloration.

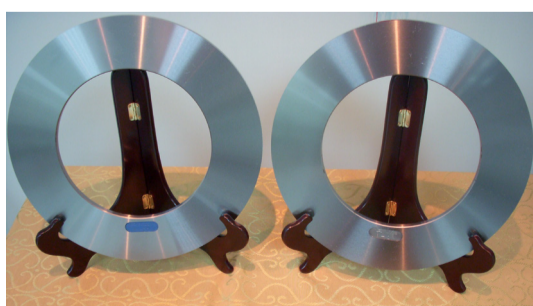

連續式光輝熱處理爐 TYPE: GMB
<http://www.hiheat.com.tw/>

NIREI CORPORATION LTD.

BOOTH NO.: 7223

SLITTER KNIVES, SPACERS, PATENTED LIGHT SPACERS

Our slitter knives are manufactured using high-toughness, wear-resistant steel that has been modified using Japanese technology. These knives are finely ground using a precision grinding machine made in Japan. They are suitable for cutting all types of steel.

TAIWAN TUNGSTEN CARBIDE CO., LTD.
 BOOTH NO.: 7222

CUSTOMIZED TUNGSTEN CARBIDE PRODUCTS

Special products can be custom-made according to customer needs, with a maximum outer diameter of up to 300mm. We specialize in providing customized die products for the production of pipes and wires in the steel manufacturing industry.
